EXPERIENCE

ATOMS DIGITAL SOLUTIONS | FULL STACK DEVELOPER
March 2023 – Current

- → Led a developer team at Atoms Digital Solutions to create the Vaaradhi Portal for an NGO, focusing on backend development and frontend-backend integration
- → Managed functionalities linked to Google Cloud services, enhancing application efficiency.
- → **Contributed to four projects during the internship**, showcasing effective teamwork and solution delivery.

PROJECTS

PHOENIX CONSULTANCY PORTAL | MongoDB, Express.js, React.js, Node.js, AWS
2023

- → Developed a student management portal for **Phoenix Educational Consultancy**, solving the hassle of manual student data upkeep and Excel sheet handling. This user-friendly portal keeps track of student details, applied universities, and visa statuses, providing an efficient digital alternative.

CLIENT MANAGEMENT SYSTEM | MERN Stack   2023

- → The Client Management Application is a robust system designed to streamline the organization of client information, branch details, and payment records. This dynamic tool empowers businesses to efficiently manage their client base with ease.

VCONNECT GLOBE | React.JS, Tailwind CSS   2023

- → Developed a fully responsive landing page for Vconnectglobe, a startup specializing in one-on-one mentorship for students aspiring to study in foreign universities.

FILE SHARING APPLICATION | HTML,CSS, JS, Express.Js, Google Cloud   2022

- → Developed a robust web application enabling users to share files with the help of a unique code and reduce the complex process. This code can be shared with others and they can download the file
- → Deployed the web application on **Google Cloud App Engine**, ensuring **high availability and scalability**

COURSES AND CERTIFICATIONS

- → Google cloud Digital Leader
- → Google Cloud Computing Foundation with Kubernetes
- → AWS Educate Introduction to Cloud 101
- → Data to Insights with Google Cloud - Coursera

SKILLS

PROGRAMMING
Java • JavaScript • Python C

LIBRARIES/FRAMEWORKS
